CYBER SECURITY ASSIGNMENT QUESTION

DAY 64

1. Identify and describe five common attacks targeting cloud computing environments.

2. Outline a typical hacking methodology for targeting cloud environments.

3. Discuss cloud security techniques and tools used to protect cloud environments from cyber threats.

4.Develop a cloud incident response plan outlining steps to be taken in the event of a security breach in a cloud environment.

5.Discuss regulatory compliance requirements and governance considerations for cloud computing.
