

DATA SCIENCE ASSIGNMENT

Day - 14:

- 1.What distinguishes Deep Learning from other subsets of machine learning?**
- 2.In deep learning, what are the typical components of a neural network?**
- 3.Which of the following is a common application of deep learning?**
- 4. Write a Python script using TensorFlow to create a simple neural network with one hidden layer to classify a set of input data**
- 5. Read a CSV file named "data.csv" using Pandas and display the first 5 rows of the DataFrame.**
