

DATA SCIENCE ASSIGNMENT

DAY 7:

1. What are the 7 QC (Quality Control) tools, and how are they used in business statistics?
2. Describe a situation where you would use a Pareto chart in business analysis.
3. Define a time series chart and its application in business analytics.
4. Provide an example of how a business might use a time series chart for decision-making.
5. What are the advantages of using advanced graphical charts like Pareto charts and Time Series charts over basic charts?
