

# Python For Data Science

## Matplotlib Cheat Sheet

### Matplotlib

Matplotlib is a Python 2D plotting library which produces publication-quality figures in a variety of hardcopy formats and interactive environments across platforms.

### Prepare The Data

#### 1D Data

```
>>> import numpy as np  
>>> x = np.linspace(0, 10, 100)  
>>> y = np.cos(x)  
>>> z = np.sin(x)
```

#### 2D Data or Images

```
>>> data = 2 * np.random.random((10, 10))  
>>> data2 = 3 * np.random.random((10, 10))  
>>> Y, X = np.mgrid[-3:3:100j, -3:3:100j]  
>>> U = -1 - X**2 + Y  
>>> V = 1 + X - Y**2  
>>> from matplotlib.cbook import get_sample_data  
>>> img = np.load(get_sample_data('axes_grid/bivariate_normal.npy'))
```

### Create Plot

```
>>> import matplotlib.pyplot as plt
```

#### Figure

```
>>> fig = plt.figure()  
>>> fig2 = plt.figure(figsize=plt.figaspect(2.0))
```

#### Axes

All plotting is done with respect to an Axes. In most cases, a subplot will fit your needs. A subplot is an axes on a grid system.

```
>>> fig.add_axes()  
>>> ax1 = fig.add_subplot(221) #row-col-num  
>>> ax2 = fig.add_subplot(212)  
>>> fig3, axes = plt.subplots(nrows=2, ncols=2)  
>>> fig4, axes2 = plt.subplots(ncols=3)
```

### Save Plot

```
>>> plt.savefig('foo.png') #Save figures  
>>> plt.savefig('foo.png', transparent=True) #Save transparent figures
```

### Show Plot

```
>>> plt.show()
```

### Plotting Routines

#### 1D Data

```
>>> fig, ax = plt.subplots()  
>>> lines = ax.plot(x,y) #Draw points with lines or markers connecting them  
>>> ax.scatter(x,y) #Draw unconnected points, scaled or colored  
>>> axes[0,0].bar([1,2,3],[3,4,5]) #Plot vertical rectangles (constant width)  
>>> axes[0,0].barh([0.5,1,2.5],[0,1,2]) #Plot horizontal rectangles (constant height)  
>>> axes[1,1].axhline(0.45) #Draw a horizontal line across axes  
>>> axes[0,1].axvline(0.65) #Draw a vertical line across axes  
>>> ax.fill(x,y,color='blue') #Draw filled polygons  
>>> ax.fill_between(x,y,color='yellow') #Fill between y-values and 0
```

#### 2D Data

```
>>> fig, ax = plt.subplots()  
>>> im = ax.imshow(img, #Colormapped or RGB arrays  
                  cmap='gist_earth',  
                  interpolation='nearest',  
                  vmin=-2,  
                  vmax=2)  
>>> axes2[0].pcolor(data2) #Pseudocolor plot of 2D array  
>>> axes2[0].pcolormesh(data) #Pseudocolor plot of 2D array  
>>> CS = plt.contour(Y,X,U) #Plot contours  
>>> axes2[1].contourf(data1) #Plot filled contours  
>>> axes2[2]= ax.clabel(CS) #Label a contour plot
```

#### Vector Fields

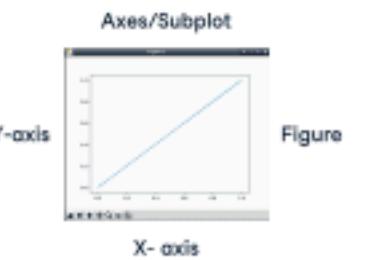

```
>>> axes[0,1].arrow(0,0,0.5,0.5) #Add an arrow to the axes  
>>> axes[1,1].quiver(y,z) #Plot a 2D field of arrows  
>>> axes[0,1].streamplot(X,Y,U,V) #Plot a 2D field of arrows
```

#### Data Distributions

```
>>> ax1.hist(y) #Plot a histogram  
>>> ax3.boxplot(y) #Make a box and whisker plot  
>>> ax3.violinplot(z) #Make a violin plot
```

### Plot Anatomy & Workflow

#### Plot Anatomy

#### Workflow

The basic steps to creating plots with matplotlib are:

- 1 Prepare Data
- 2 Create Plot
- 3 Plot
- 4 Customized Plot
- 5 Save Plot
- 6 Show Plot

```
>>> import matplotlib.pyplot as plt  
>>> x = [1,2,3,4] #Step 1  
>>> y = [10,20,25,30] #Step 2  
>>> fig = plt.figure() #Step 2  
>>> ax = fig.add_subplot(111) #Step 3  
>>> ax.plot(x, y, color='lightblue', linewidth=3) #Step 3, 4  
>>> ax.scatter([2,4,6],  
              [5,15,25],  
              color='darkgreen',  
              marker='^')  
>>> ax.set_xlim(1, 6.5)  
>>> plt.savefig('foo.png') #Step 5  
>>> plt.show() #Step 6
```

### Close and Clear

```
>>> plt.cls() #Clear an axis  
>>> plt.clf() #Clear the entire figure  
>>> plt.close() #Close a window
```

### Plotting Cutomize Plot

#### Colors, Color Bars & Color Maps

```
>>> plt.plot(x, x, x**2, x, x**3)  
>>> ax.plot(x, y, alpha = 0.4)  
>>> ax.plot(x, y, c='k')  
>>> fig.colorbar(im, orientation='horizontal')  
>>> im = ax.imshow(img,  
                  cmap='seismic')
```

#### Markers

```
>>> fig, ax = plt.subplots()  
>>> ax.scatter(x,y,marker=".")  
>>> ax.plot(x,y,marker="o")
```

#### Linestyles

```
>>> plt.plot(x,y,linewidth=4.0)  
>>> plt.plot(x,y,ls='solid')  
>>> plt.plot(x,y,ls='--')  
>>> plt.plot(x,y,'--',x**2,y**2,'-.')  
>>> plt.setp(lines,color='r',linewidth=4.0)
```

#### Text & Annotations

```
>>> ax.text(1,  
           -2.1,  
           'Example Graph',  
           style='italic')  
>>> ax.annotate("Sine",  
                 xy=(8, 0),  
                 xycoords='data',  
                 xytext=(10.5, 0),  
                 textcoords='data',  
                 arrowprops=dict(arrowstyle="→",  
                               connectionstyle="arc3"))
```

#### Mathtext

```
>>> plt.title(r'$\sigma_{\mathrm{i}}=15$', fontsize=20)
```

#### Limits, Legends and Layouts

##### Limits & Autoscaling

```
>>> ax.margins(x=0.0,y=0.1) #Add padding to a plot  
>>> ax.axis('equal') #Set the aspect ratio of the plot to 1  
>>> ax.set(xlim=[0,10.5],ylim=[-1.5,1.5]) #Set limits for x-and y-axis  
>>> ax.set_xlim(0,10.5) #Set limits for x-axis
```

##### Legends

```
>>> ax.set(title='An Example Axes', #Set a title and x-and y-axis labels  
           ylabel='Y-Axis',  
           xlabel='X-Axis')  
>>> ax.legend(loc='best') #No overlapping plot elements
```

##### Ticks

```
>>> ax.xaxis.set(ticks=range(1,5), #Manually set x-ticks  
                  ticklabels=[3,10B,-12,"foo"])  
>>> ax.tick_params(axis='y', #Make y-ticks longer and go in and out  
                  direction='inout',  
                  length=10)
```

##### Subplot Spacing

```
>>> fig3.subplots_adjust(wspace=0.5, #Adjust the spacing between subplots  
                           hspace=0.3,  
                           left=0.125,  
                           right=0.9,  
                           top=0.9,  
                           bottom=0.1)  
>>> fig.tight_layout() #Fit subplot(s) in to the figure area
```

##### Axis Spines

```
>>> ax1.spines['top'].set_visible(False) #Make the top axis line for a plot invisible  
>>> ax1.spines['bottom'].set_position(('outward',10)) #Move the bottom axis line outward
```
