

365 DataScience Ordering the rows from a data table according to the values in a column

Step 1 Libraries import

```
# use the well-known convention  
import pandas as pd
```

Step 2 Create a Series object

```
numbers = pd.Series([155, 10, 235, 455, 600])  
numbers
```

```
0    155  
1     10  
2    235  
3    455  
4    600  
dtype: int64
```

Step 3 Sort the values

```
numbers.sort_values()
```

```
1     10  
0    155  
2    235  
3    455  
4    600  
dtype: int64
```

```
# In an descending order
```

```
numbers.sort_values(ascending=False)
```

```
4    600  
3    455  
2    235  
0    155  
1     10  
dtype: int64
```
